BACKEND REQUIREMENT DOCUMENT (UPDATED)

Project: Hyperlocal Freelance Services Platform

---

1. KEY BUSINESS RULE (FINAL & IMPORTANT)

1. **Wallet is mandatory** for every service provider.
2. **All platform charges are deducted from wallet**, regardless of how customer pays.
3. Cash / UPI / bank transfer is allowed.
4. **Offline payments do NOT reduce XP**.
5. **Offline payments incur DOUBLE platform charge**, deducted from wallet.
6. XP is based on **work quality & reliability**, not payment mode.

---

2. CUSTOMER WORKFLOW (END-TO-END)

2.1 Customer Journey

```
Login
→ Home Page
→ Search service (Plumber / Electrician / etc.)
→ View list of providers (ranked)
→ View provider profile
→ Book appointment
→ Choose payment preference
→ Job completion
→ Review + optional image upload
```

2.2 Customer Flow Details

1. **Login**
    - Phone OTP based
    - Role = customer
2. **Home Page**
    - Service category list
    - Location auto-detected
    - Saved addresses
3. **Search & Listing**
    - Filters:
        - Distance
        - Rating
        - Experience
        - Price

        - Availability
    - Default sorting:
    - `visibility_score DESC`
    - `level DESC`
    - `rating_avg DESC`
    - `total_jobs DESC`
4. **Provider Profile Page**
    - Profile photo
    - Service details
    - Experience
    - Ratings & reviews
    - Price
    - XP level badge
    - Availability
5. **Appointment Booking**
    - Select:
        - Date & time
        - Address
        - Job notes (optional)
    - Confirm details
6. **Payment Preference (Not Payment Yet)**
    - GPay / UPI
    - Bank transfer
    - Cash
    - In-app wallet (future)
7. **Job Execution**
    - Provider arrives
    - Work completed
    - Job marked completed by provider
8. **Payment & Review**
    - Customer pays (cash / UPI / bank)
    - Customer submits:
        - Star rating
        - Review
        - Optional work images

---

4. WALLET & COMMISSION LOGIC (FINAL)

4.1 Commission Rules

Scenario	Commission Deduction
Online / UPI / Bank	Normal commission
Cash payment	**2 × commission**

Example:

- Job value: ₹500
- Platform charge: ₹50

UPI / Bank

- Wallet credit: +₹500
- Commission debit: -₹50
- Net wallet change: +₹450

Cash

- Wallet credit: +₹0
- Commission debit: -₹100
- Net wallet change: -₹100

---

5. XP & LEVEL SYSTEM (UPDATED – PAYMENT NEUTRAL)

5.1 XP GAIN RULES

Action	XP
Job completed	+20
5★ rating	+30
4★ rating	+15
On-time arrival	+10
Upload job photos	+5

5.2 XP PENALTIES (ONLY BEHAVIOR-BASED)

Action	XP
Job cancellation	-30
Late arrival	-10
1–2★ rating	-40
Fake completion	-100

❌ **NO XP penalty for cash / offline payment**

5.3 Level Thresholds

Level	XP
1	0
2	200
3	500
4	900
5	1500
6	2500

---

6. VISIBILITY SCORE (LISTING RANKING)

6.1 Visibility Score Logic

Initial: `100`

Decrease only for:

- Job cancellation
- Repeated bad reviews
- Admin penalty

Cash payment does **NOT** affect visibility directly.

---

7. DATABASE – ADDITIONAL IMPORTANT FIELDS

Jobs Table (Updated)

```
payment_preference ENUM('cash','upi','bank'),
payment_collected BOOLEAN DEFAULT false
```

Wallet Transactions

```
transaction_type ENUM(
  'job_credit',
  'commission',
  'offline_extra_commission',
  'withdrawal'
)
```

---

8. ADMIN REQUIREMENTS

Admin must:

- View wallet balances

- Track offline commissions
- Approve withdrawals
- Monitor repeat cash-heavy providers
- Suspend abuse cases
- Adjust commission rates

SERVICE PROVIDER DASHBOARD REQUIREMENTS

1. PURPOSE OF PROVIDER DASHBOARD

The **Provider Dashboard** is the control center for freelancers to:

- Manage jobs
- Track earnings
- Monitor XP & level
- Control availability
- Withdraw money

This dashboard must be available **inside the provider app** (not admin).

---

2. PROVIDER DASHBOARD – MAIN SECTIONS

2.1 Dashboard Home (Summary View)

When provider opens the app, show a **summary card view**:

Stats to display:

- Today's jobs count
- Upcoming jobs
- Completed jobs
- Wallet balance
- XP points
- Current level
- Average rating
- Visibility status (Normal / Reduced)

---

3. JOB MANAGEMENT SECTION

3.1 Job Tabs (Very Important)

Provider must see jobs grouped by status:

Tabs:

1. **New Requests**
2. **Accepted / Upcoming**
3. **Ongoing**
4. **Completed**
5. **Cancelled**

3.2 New Job Requests

For each job request show:

- Customer name
- Service type
- Distance (km)
- Scheduled time
- Estimated price
- Payment preference (cash / upi / bank)

Actions:

- Accept
- Reject (optional reason)

Rules:

- Auto-cancel if no response within X seconds
- Rejecting too many jobs may affect visibility (optional later)

3.3 Accepted / Upcoming Jobs

Show:

- Customer address (masked until accepted)
- Appointment time
- Contact button (masked calling)
- Job notes

Actions:

- Navigate (Google Maps)

- Mark “On the way”
- Cancel (with reason)

3.4 Ongoing Job

Show:

- Job start time
- Customer details
- Payment preference
- Upload work photos (optional)

Actions:

- Mark “Work Started”
- Mark “Work Completed”

3.5 Completed Jobs

Show:

- Job date & time
- Amount
- Commission deducted
- Wallet impact
- Rating received
- XP earned

---

4. WALLET DASHBOARD (PROVIDER)

4.1 Wallet Overview

Show:

- Current wallet balance
- Total earnings
- Total commission paid
- Total withdrawals

4.2 Wallet Transactions List

Each transaction should show:

- Date
- Job ID (if applicable)
- Transaction type:
  - Job credit
  - Commission deduction
  - Offline extra commission
  - Withdrawal
- Amount (+ / -)
- Description

4.3 Withdrawal Section

- Withdraw anytime
- Enter amount
- Choose bank account
- View withdrawal history
- Status:
  - Pending
  - Completed
  - Failed

---

5. XP, LEVEL & PERFORMANCE DASHBOARD

5.1 XP Progress

Show:

- Current XP
- XP required for next level
- Progress bar

5.2 Performance Metrics

- Average rating
- Total completed jobs
- Cancellation rate
- On-time percentage

5.3 Level Benefits Info

Show:

- Current level benefits
- Next level benefits (locked)

This motivates providers to improve quality.

---

6. AVAILABILITY & PROFILE CONTROL

6.1 Availability Toggle

- Online / Offline
- Working hours
- Emergency availability toggle

6.2 Profile Management

- Edit service details
- Update pricing
- Update service radius
- Upload documents
- View verification status

---

7. NOTIFICATIONS (PROVIDER SIDE)

Provider should receive notifications for:

- New job request
- Job accepted confirmation
- Job cancelled
- Wallet credit / debit
- Withdrawal status
- Low wallet balance warning
- XP level up

---

8. DATABASE FIELDS REQUIRED FOR DASHBOARD

Jobs

```
job_status
```

```
scheduled_at
started_at
completed_at
final_price
payment_preference
```

Wallet

```
balance
total_earned
total_commission_paid
```

Provider

```
is_online
xp_points
level
visibility_score
rating_avg
```

---

9. NON-FUNCTIONAL REQUIREMENTS

- Dashboard data must be **real-time or near real-time**
- API responses optimized (pagination required)
- No heavy calculations on frontend
- All wallet data fetched from ledger, not cached values
